Proposal for Pilot Test Scoping Study Passive Treatment for the Upper C....pdf

FYI – If you're interested in a passive wetlands treatment proposal being considered by the Animas River stakeholders. Let me know if you care to sit in on the discussion.

Subject: ARSG Technical Work Group Meeting

Dear ARSG Technical workgroup – Ron Borrego with AMEC in Durango has been talking with a couple of us about a wetlands treatment project they have been working on at a large mine drainage site in the San Juans. They have approached Kinross to fund a scoping study about how this type of wetlands could be utilized to deal with metal loading in upper Cement Creek. Kinross has not made any decisions regarding funding. Kinross wants ARSG to decide if such a study would be useful and worthwhile, and if so, are there other funding partners that might want to participate.

AMEC would like to talk more about their proposal with the technical work group. We are trying to set up a work group meeting in Durango on the afternoon of January 22nd at the public lands center. We will have call in capability. I will send out the number later.
